

NSF Rated LED Solutions For Food Service/Processing Locations

National Sanitation Foundation Approved Lighting

Solas Ray™ Lighting manufactures multiple LED lighting solutions tested and certified to NSF requirements for use in food processing, packaging and storage facilities.

- **Designed For Food Service**

Solas Ray™ NSF rated fixtures are designed to excel in food service environments where cleanliness and sanitization are required for the safe handling and storage of food products. They are also well suited for agriculture and horticulture applications. Standard and hazardous location (HazLoc) NSF fixtures are available.

- **Washdown ready**

Solas Ray™ NSF fixtures are wash-down ready to make cleaning and sanitizing easy. Several models are IP69K rated to withstand intensive cleaning with high-pressure, high temperature jets.

- **Buy America Act (BAA)**

Many Solas Ray™ products are BAA compliant as they are designed/assembled in the U.S.A.

- **Inventory / Service**

We carry significant finished goods inventory in our Indianapolis, IN location ready to ship. We offer second-to-none service/expertise with representatives throughout the U.S. and Canada.

Standard Fixtures
